

Singulaire Precision Vacuum Seeder

Inset: High Density Model

Main Picture: Standard Model

The superior technology of the metering unit enables the **Singulaire 780** to achieve the highest standards of performance.

Plants All Types of Seeds

Thanks to the clever airflow system that handles natural as well as coated seeds.

Consistent Precision

This is due to the thin seed discs that flex to keep a perfect seal.

Saving on Seed Costs

The precise selection of individual seeds reduces wastage to a minimum.

Easy to Handle and Operate

Due to the unique single-sided, tough but lightweight, chassis construction and compact fan.

Excellent Depth Control

Provided by the floating parallel linkage and the self-cleaning rubber tyres.

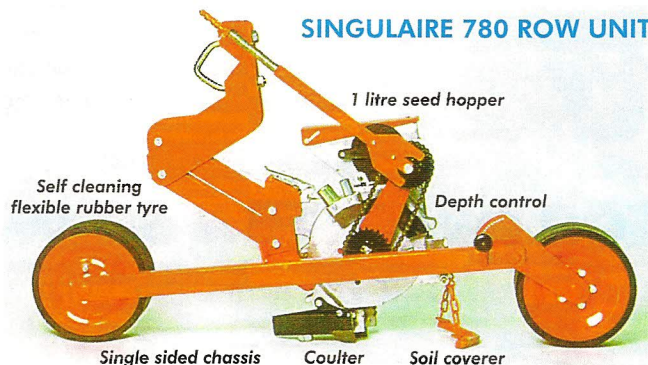

780

The Stanhay **Singulaire 780** precision vacuum seeder accurately singulates and plants all vegetable and salad seeds to produce top quality, high value crops.

Unique in its ability to sow natural seeds in 1, 2, 3 and now 4 lines from each unit, the Singulaire is precise and efficient, saving you time and money.

Ideal for smaller growers of specialist crops, the **Singulaire 780** is economically priced and built for easy handling by smaller tractors.

SINGULAIRE 780 ROW UNIT

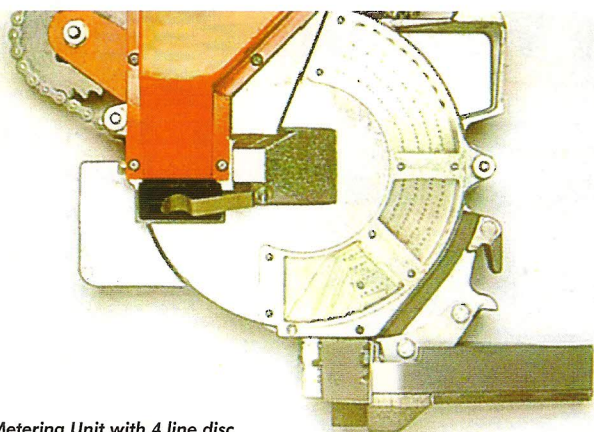

A MODEL FOR EVERY GROWER

The **Singulaire 780** is available in a range of models from 2 to 6 rows.

A special *High Density* model lets you plant up to 27 lines at 50mm apart across the full width of a bed.

Singulaire Precision Vacuum Seeder

Metering Unit with 4 line disc

SEED DISCS

By selecting the correct seed disc you can plant natural or coated seeds in 1, 2, 3 and now 4 lines. One seed disc usually handles all the grades of any seed type, saving you time and expense. Here are just some of the seeds you can plant:

Asparagus	Celery	Melon	Spinach
Broccoli	Chicory	Onion	Sugar Beet
Cabbage	Cucumber	Parsley	Swede
Cantaloupe	Leek	Pepper	Tomato
Carrot	Lettuce	Radish	Turnip
Cauliflower	Lucerne	Red Beet	Watermelon

ELECTRONIC ROTATION MONITOR

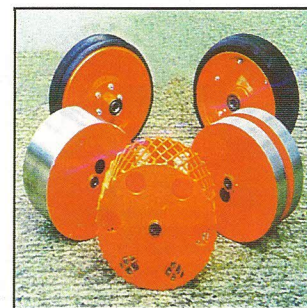

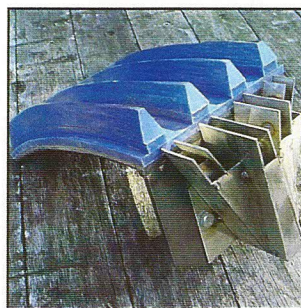

These monitors will audibly and visually warn the operator, in-cab, if any of the metering units stop rotating correctly and also warns of seed hopper low level.

COULTERS AND WHEELS

The **Singulaire 780** can be fitted with single line coulters, or a selection of multi-line coulters up to 150mm wide.

Wheel options include flexible rubber, 120mm wide cage or stainless steel, and 190mm wide stainless.

Singulaire 780
