**COMPANY BACKGROUND** Tew Manufacturing Corporation was formed and began business in October 1952 at Fairport, New York for the express purpose of manufacturing Friend Brand fruit packing house equipment. In 1954 it purchased the grader division of the Trescott Company and continued manufacturing both Friend and Trescott machines until 1960 when both lines were discontinued in favor of an improved Tew line of packing house equipment. Since that date, continuing efforts have been made in engineering and manufacturing; permitting us to now offer our finest machinery for cleaning and packing fruits and vegetables. We will not lower our standards of quality of parts and workmanship to compete with low price so called copies of our machines. Please call our toll free number to get details and references about our reliable machines.

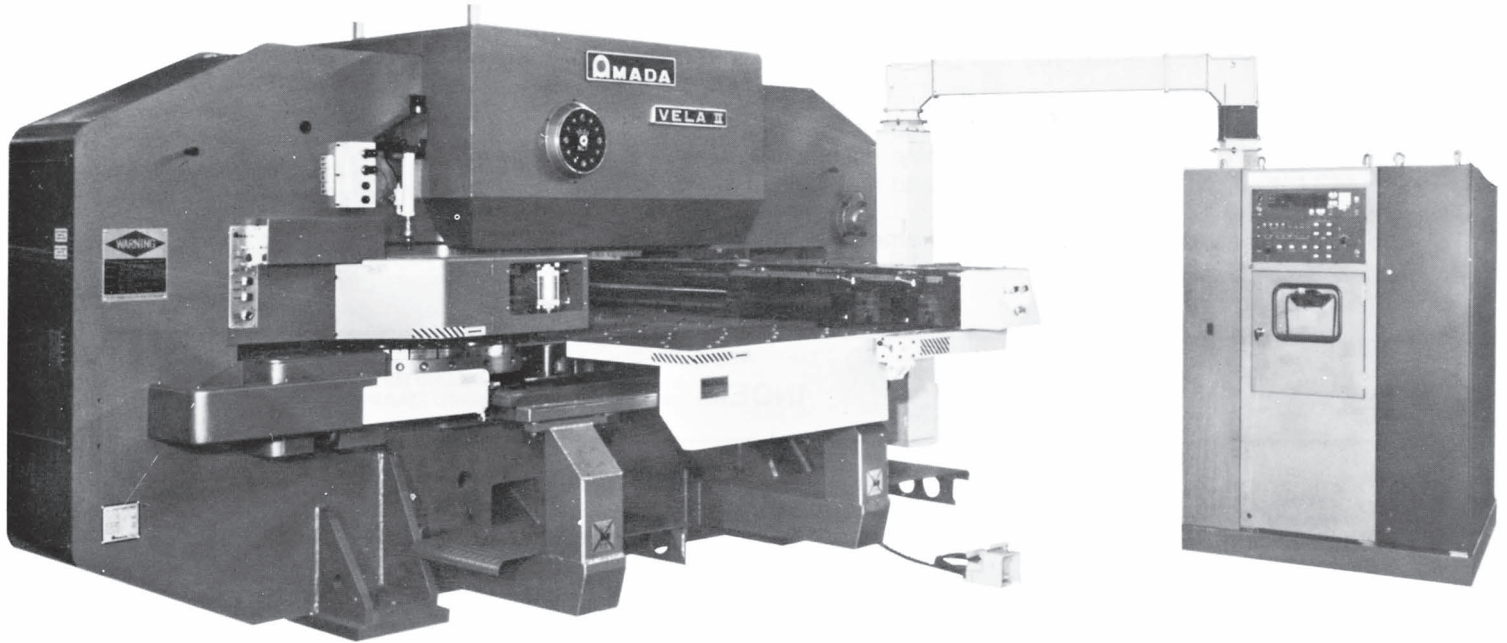

**POLICY & GUARANTEE** Tew Manufacturing Corporation sells its machines direct to the consumer and not through any distributor or dealer organization. This allows us to price superior equipment lower than our competitors machinery to the benefit of our customers. We guarantee our products against defects in material and workmanship for a period of one year after shipment. If any item or machine is defective, we will (1) repair it. If brought back to our factory, (2) pay local serviceman to make the repair at your place, or (3) replace the part or machine free of charge and prepaid. Customer to install replaced part or machine.

**TERMS OF SALE & ORDERING INFORMATION** Our terms for machines are 20% deposit with order and balance due before shipment or pick-up is made. Certified or bank cashiers checks get immediate shipment or pick-up, regular checks must be held for 10 days or mailed 10 days in advance to clear before shipment or pick-up can be made. Our terms for parts are net/10 for established accounts and COD for new accounts. We now accept VISA & MASTERCARD for payment of parts only and for amounts less than \$2000. Any invoice not paid within 30 days of invoice will be subject to a 1 1/2% late charge per month and losing your open account status with us. Due to processing costs, our minimum order is \$25.00

# MODERN PRODUCTION AND STOCK CONTROL

Tew Fruit and Vegetable Processing Machines are carefully designed by qualified mechanical engineers who combine over 55 years of research and production experience with modern state of the art technology. Our precision-built equipment is manufactured using the latest types of metal working machinery. This results in extreme uniformity for parts that fit and work properly.

This 30 ton Vela II Amada Machine shapes and perforates our side panels with computer directed programming accurate to + .001".

## **PARTS**

Experienced workers assure a high level of accuracy. All parts and subassemblies are double checked before use on machines or for replacements.

## **PROMPT SERVICE**

We specialize in processing and shipping quickly. We offer daily service by UPS, all major motor freight carriers and if necessary by air from nearby Rochester, NY airport.

# A WORD OF EXPLANATION ABOUT OUR LINE AND CATALOG

Our equipment is offered in two widths and consequently is capable of two packing capacities. The choice depends upon your requirements. Machine lengths are the same for both widths.

Series 1650 is 16<sup>1</sup>/<sub>2</sub>" wide inside and can handle up to 100 bushels per hour or more.

Series 2450 is 24<sup>1</sup>/<sub>2</sub>" wide inside and can handle up to 150 bushels per hour or more.

All units are engineered to be used individually or bolted together to form our standard machine assemblies or assemblies to your order. You can purchase one or more units initially and add to them at a later date.

Pages 5, 6 and 7 describe standard separate units.

Pages 8 and 9 show basic "starter" assemblies.

Pages 10, 11, 12 and 13 are major machine assemblies.

Pages 14 through 19 cover repair parts and materials.

We will be pleased to discuss your requirements by phone or letter.

## RECEIVER BELT CONVEYOR

This conveyor provides a convenient safe means of loading produce into an eliminator, a washer or a dry-brusher. It is adjustable in height and equipped with a smooth white rubber belt. Flared sides contribute to the ease of loading either over the end or over the side. A rubber covered discharge plate carries the produce from the belt to the next station in the processing line. The belt is powered by the adjacent washer or dry brusher or can be fitted with its own motor.

| SPECIFICATIONS—RECEIVER          | Series 1650                      | Series 2450                      |

JACK SHAFT, BEARINGS, SPROCKETS & CHAIN TO RECEIVER BELT FROM WASHER OR BRUSHER \$100.00  
SEPARATE GEARMOTOR DRIVE, ADD \$375.00

## WASHER

With a washer, the grower-packer can process wet or dry produce. Produce can be packed directly from wet orchard or field, or from cold storage. A washer is also more effective than a dry brusher in removing spray residue. The Tew washer contains twelve 3<sup>1</sup>/<sub>2</sub>" diameter brushes in 3' 10" frame. The 1650 washer uses from 1 to 3 G.P.M. and the 2450 washer from 2 to 5 G.P.M.

Special close-filled brushes for cherry tomatoes set installed in new washer-add to price of washer.

Series 1650 \$250.00  
Series 2450 \$375.00

Extra Spray Manifold for Better Cleaning  
Series 1650 \$135.00  
Series 2450 \$160.00

Series 2450 ..... \$3355.00

Crate charge if shipped- \$60.00

## WATER ABSORBER

To remove excess water from the produce as it leaves the washer and permit continuous processing, the Tew water absorber uses seven donut-style rolls. It is powered by washer.

| WATER ABSORBER SPECIFICATIONS | Series 1650                      | Series 2450                      |

**ELIMINATOR—shown with wire sizing belt—also available with rubber sizing belt.**

The eliminator is a chain-type sizing unit used to eliminate undersized produce before the cleaning, sorting, and packaging operations are performed. The Tew eliminator used the lower rubber-covered roll to drive the sizing chain. This feature provides two distinct advantages. Any Size of chain can be installed and used on the machine without changing rolls. Pinching and bruising of fruit at the discharge end is virtually eliminated. Entrance and discharge plates are rubber covered to protect the produce from damage. The rubber-lined chute under the sizing chain can be adjusted on-site to discharge to the right or to the left.

PRICE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE

## ROTARY PACKING TABLE

This power driven table is more efficient than a gravity table because it collects produce from an absorber or sizing unit and moves it to the packers. All packing material can be placed at the best location with respect to the workers thus eliminating congestion.

### ROTARY PACKING TABLE SPECIFICATIONS

- Diameter Available: 5'
- Speed: 3 rpm\*
- Top: 3/4" thick with special white finish top and bottom for ease of cleaning and durability.
- Height: 33" minimum  
45" maximum (adjustable)
- Motor: Gearhead type, 110-volt single phase, on pivot base.  
V-belt drive to center shaft on table.
- Bearings: Permanently lubricated bronze bearing.

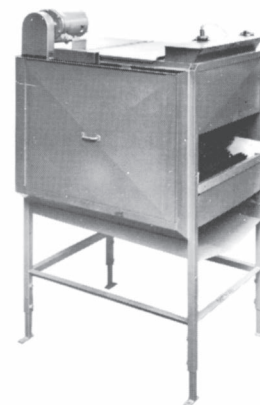

**ROTARY TABLE PRICE**  
 With gearmotor . . . . . \$2275.00  
 Crate charge if shipped- \$70.00  
 Shipping wt. crated- 300#

## WAXER—FOR VEGETABLES

An efficient HOT Wax applicator for Tomatoes, Cucumbers, Peppers. Has 9 lower bed brushes and 1 overhead applicator brush. Uses any standard hot type vegetable wax. Comes complete with motor ready to use. OVER-ALL Length is 3'.

 Series 2450 . . . . . \$3355.00  
 Crate charge if shipped- \$60.00

## 5' LONG ROLLER INSPECTION CONVEYOR WITH GEARMOTOR DRIVE.

Drip pan  
Add \$125

The Roller Conveyor provides an excellent space for inspecting and sorting produce. Each piece of fruit or vegetable turns as it moves along so workers can see every side of it. Comes complete with gearmotor. Two people can work each side if necessary, but normally only one is needed.

The Elevating style, as shown, raises produce approximately 9". This means the Receiving Conveyor of machine can be at a low level while packing end can be conveniently higher. See Machine MR on page 11.

A Level Roller can be used for a Receiving Unit of a machine as well as for sorting. Model CW on page 9 illustrates an excellent assembly for feeding a cider-making operation.

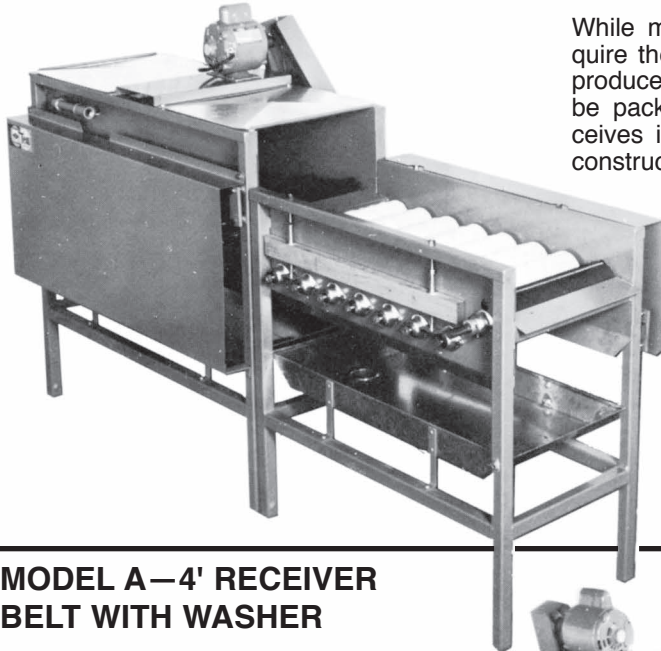

### PRICES- 5' LONG ROLLER INSPECTION CONVEYOR (Includes Motor)

### SHIPPING WT.

|                   |           |       |      |
|-------------------|-----------|-------|------|
| Series 1650 ..... | \$2515.00 | ..... | 300# |
| Series 2450 ..... | \$2935.00 | ..... | 350# |

*Crate charge if shipped-\$60.00*

## WASHER AND ABSORBER

While many packers can do with the washer alone, others require the absorber to remove most of the waster from the clean produce. Damp produce from the absorber can, in most cases, be packed directly into shipping containers. The absorber receives its power from the washer. One guard left off to show construction.

### PRICES- WASHER AND WATER ABSORBER (Includes Motor)

### SHIPPING WT.

|                   |           |       |      |

PRICE SUBJECT TO CHANGE WITHOUT PRIOR NOTICE

**MODEL H—INCLUDES 4' RECEIVER BELT, WASHER, ABSORBER, ROTARY TABLE**

This assembly permits receiving produce from field crates or baskets, washing it for optimum appearance and then packing it from the rotary table. Two to four people can operate the assembly with maximum efficiency packing up to 100 bushels per hour with the 16½" and to 150 bushels per hour with the 24½". One ½ hp motor and one ¼ hp gearmotor run the machine.

OVER-ALL LENGTH = 16'

**PRICES—MODEL H MACHINE  
(including Motors) .**
